OBJECTIVE

Aspiring Data Engineer with strong analytical and programming skills in Python and SQL. Passionate about building reliable ETL pipelines, maintaining data quality, and optimizing data workflows for analytics and ML models. Seeking to join Branch as a Data Engineering Intern to design scalable data systems and contribute to modern cloud-based data infrastructure.

EDUCATION

Bachelor of Engineering in Electronics and Communication Engineering, University Institute of Technology, Burdwan University, West Bengal 2021 – 2025
CGPA: 7.9 / 10.0

Higher Secondary Education (WBCHSE), Purulia Zilla School 2020
Score: 91.2%

Secondary Education (WBBSE), Purulia Zilla School 2018
Score: 93.8%

SKILLS

Programming	Python, SQL, PySpark, JavaScript, HTML, CSS
Data Engineering	ETL/ELT Pipelines, Data Warehousing, Airflow, Dimensional Modeling, Data Validation
Frameworks	TensorFlow, Django, Django Rest Framework
Libraries	Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
Cloud	AWS S3
Tools	Power BI, Excel, Git, Postman, Figma, Jupyter Notebook
Concepts	Machine Learning, Predictive Modeling, Anomaly Detection, Data Visualization

EXPERIENCE

Data Analyst Intern Feb 2025 – Mar 2025
Elevate Labs *Remote*

- Processed structured engagement data to derive user behavior metrics, improving insights accuracy by 20%.
- Designed Power BI dashboards integrating SQL-based KPIs for visual trend tracking.
- Built automated Python scripts for ETL workflows, reducing manual reporting by 8 hours weekly.
- Collaborated with data teams to refine data sources, ensuring consistency and quality validation.

Web Developer Intern Apr 2024 – Jul 2024
Cognifyz Technologies *Remote*

- Created responsive front-end modules using HTML, CSS, and JavaScript.
- Integrated APIs and backend connections for smooth data exchange and system reliability.
- Improved site performance metrics by 15% through optimized code and load testing.

PROJECTS

Customer Churn Analysis – Python, Pandas, SQL, Power BI

- Built an end-to-end pipeline from raw CSV ingestion to data cleaning, transformation, and visualization.
- Used logistic regression and random forest to predict churn probability based on behavioral features.

- Monitored model output and performance metrics through automated scripts and dashboards.
- Improved model precision by 25% after feature selection and parameter tuning.

Swiggy Data Analysis – Python, SQL, Power BI

- Performed data extraction and transformation using SQL joins and aggregation techniques.
- Created Power BI dashboards highlighting cuisine popularity, order frequency, and time trends.
- Built DAX measures for time-based forecasting and revenue tracking.
- Reduced query latency by 40% with optimized indexing and query tuning.

Stock Price Prediction – Python, TensorFlow, LSTM

- Implemented data preprocessing pipelines for real-time financial datasets using Yahoo Finance API.
- Developed deep learning models (LSTM) and compared with ARIMA for short-term forecasting.
- Evaluated performance using RMSE and trend correlation metrics.
- Automated model retraining to maintain accuracy with live data streams.

Healthcare Data Management System – SQL, MySQL

- Designed a relational schema for patient and billing management using star schema principles.
- Used stored procedures and window functions for operational analytics and summary reports.
- Improved query efficiency by 45% with proper indexing and schema normalization.
- Validated data quality with constraints and cross-table integrity checks.

CERTIFICATIONS

AWS Cloud Practitioner – AWS Skill Builder
Data Analysis Virtual Job Simulation – Deloitte
SEO Certification – SpWebDevs
NSS Certificate – Government of India

ADDITIONAL INFORMATION

Strong understanding of ETL pipelines, OLAP systems, and cloud data workflows.
Knowledge of Airflow, dbt, and data warehouse architectures (Snowflake, Redshift).
Excellent problem-solving and communication skills with an interest in scalable data solutions.
Available for 4–6 month internship with potential for full-time conversion.
