Hiring Manager
Ericsson India Pvt. Ltd.

Subject: Application for Data Scientist Position

Dear Hiring Manager,

I am writing to express my interest in the Data Scientist position at Ericsson. As a recent graduate of Electronics and Communication Engineering student from the University Institute of Technology, Burdwan University, I have developed a strong foundation in data analytics, machine learning, and cloud-based modeling. My academic training, combined with practical internship and project experience, aligns well with Ericsson's mission of using advanced analytics and AI to drive intelligent network solutions.

During my internship at Elevate Labs, I analyzed user engagement data to uncover trends and built Power BI dashboards that improved decision-making efficiency. My academic projects, such as *Customer Churn Analysis* and *Stock Price Prediction*, involved designing predictive models using Python, Scikit-learn, and TensorFlow, enhancing accuracy and optimizing data workflows. Additionally, my exposure to PySpark, SQL, and AWS Cloud has strengthened my ability to process large datasets and deploy scalable ML solutions.

What excites me most about Ericsson is its commitment to innovation in 5G, automation, and AI-driven network optimization. I am eager to contribute by building data models that enhance system intelligence, detect anomalies, and support data-driven strategies. As a fresher, I bring curiosity, adaptability, and a deep passion for learning emerging technologies, along with a collaborative mindset essential for dynamic teams like yours.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills and enthusiasm can contribute to Ericsson's Data Science initiatives. I look forward to the possibility of joining your innovative and forward-thinking team.

Sincerely,
Rijjit Dutta
