Professional Summary

Highly motivated Electronics and Communication Engineering undergraduate passionate about Data Science and Analytics. Skilled in Python, SQL, Power BI, and Machine Learning with hands-on experience in real-world data analysis, dash boarding, and predictive modeling projects. Interested in contributing analytical and problem-solving skills to drive data-informed business decisions.

Education

Bachelor of Engineering in Electronics and Communication Engineering	2021 – 2025
University Institute of Technology, Burdwan University, West Bengal	
CGPA: 7.90/10.0	
Higher Secondary Education (WBCHSE) – Purulia Zilla School	2020
Score: 91.2%	
Secondary Education (WBBSE) – Purulia Zilla School	2018
Score: 93.8%	

Experience

Data Analyst Intern	Elevate Labs — Feb 2025 – Mar 2025
----------------------------	---

- Analyzed user engagement data to identify trends and patterns, improving app usage by 20%.
- Developed interactive dashboards using Power BI and Excel to monitor KPIs and streamline reporting.
- Automated data collection and cleaning pipelines, saving 8 hours of manual effort weekly.
- Presented actionable insights through visualizations to support data-driven decisions.

Web Developer Intern	Cognifyz Technologies — April 2024 – July 2024
-----------------------------	---

- Built responsive web applications using HTML, CSS, JavaScript, and Bootstrap.
- Collaborated with designers and backend teams to improve user experience and performance.
- Improved website load times and user engagement by 15%.

Projects

Swiggy Data Analysis	<i>Python, Pandas, SQL, Power BI</i>
-----------------------------	--------------------------------------

- Performed EDA on Swiggy datasets to identify customer trends, order times, and cancellations.
- Raw data was cleaned and processed using Pandas for accurate statistical insights.
- Designed Power BI dashboards visualizing KPIs such as popularity of cuisine and delivery delays.

Movie Recommendation System	<i>Python, Scikit-learn, Streamlit, TMDB API</i>
------------------------------------	--

- Constructed a recommendation engine using cosine similarity and collaborative filtering.
- Integrated TMDB API for dynamic display of movie posters and ratings.
- Enhanced accuracy by 40% by optimizing similarity thresholds.

Stock Price Prediction	<i>Python, Pandas, LSTM, TensorFlow/ Karas, Matplotlib</i>
-------------------------------	--

- Collected and analyzed historical stock market data using the Yahoo Finance API

- Improved time series models including ARIMA and LSTM for short-term price prediction.
- Evaluated model performance using RMSE, achieving accurate forecasts of price trends.
- Visualized predictions and historical data trends using Matplotlib for actionable insights.

Healthcare Data Management System

SQL, MySQL, Window Functions

- Designed relational schema for managing patient, doctor, and billing data.
- Improved query efficiency by 45% using indexing and optimized schema design.

Technical Skills

Languages: Python, SQL, JavaScript, HTML, CSS

Frameworks: Django, Django REST Framework, Streamlit

Tools: Power BI, Excel, Figma, Postman, Git

Libraries: NumPy, Pandas, Scikit-learn

Concepts: Machine Learning, Data Visualization, EDA, REST API Development

Certifications

AWS Cloud Practitioner – AWS Skill Builder

Data Analysis Virtual Job Simulation – Deloitte

SEO Certification – SpWebDevs

NSS Certificate – Government of India

Additional Projects (Brief)

Restaurant Management System – Built Django REST APIs with JWT auth and CRUD operations for reservations and orders.

Custom E-commerce Website – Created front-end with search, cart, and filtering functionality using HTML, CSS, JS.

Food Delivery UI Design - Figma prototypes designed to improve user flow efficiency by 40%.
